

## MAN-MADE HABITAT FOR *COLIAS EURYTHEME*

THE ILLUSTRATION ABOVE shows a man-made habitat for *Colias eurytheme*. This is an alfalfa field in the southern part of the San Joaquin Valley of California. The field is being cut on the left. Adults are shown at flowers on the right. In this area, the frequency of white females, in contrast to orange-yellow females and males, was about 65% white indicating a gene frequency of about 40% for this dominant characteristic.
